

Help protect your business

McAfee® SaaS Endpoint Protection Service from AT&T Cloud-based protection for Windows® tablets, laptops, desktops & servers

Big business solution. Small business price.

Don't you want one less thing to worry about? You can with [McAfee® Endpoint Protection](#) for your businesses tablets, laptops, PCs and servers. Our service uses the same underlying technology used by big businesses at a fraction of the cost, including:

- [Virus and Hacker Protection](#)
 - Desktop and Server Anti-Virus and Anti-Spyware
- [Simple and Virtual Management](#)
 - Cloud-based security model; fully customized dashboard
- [Safe Searching and Shopping](#)
 - Layered technology that acts as a highly secured gateway to the web
- [Website Blocking](#)
 - Web filtering to help reduce attacks
- [Email Virus Protection](#)
 - Email Server and Cloud-based email protection
- [24/7 customer support](#)

The best part? Your devices are protected via a layered security model on or off your network. Your employees can work remotely and the security needs for their devices can be managed from an Internet connection.

This layered security is always on and up-to-date. Your subscription is scalable and entitles you to all the new features and improved functionality that automatically updates over an Internet connection.
